

I do not believe that XM Radio's "XM Instant Traffic & Weather" should be blocked. I am an over the road truck driver and it is very helpful to me for a couple of different reasons. The first reason is when I travel through a city, I do not know what the local radio stations are, so I can't always find a local station for traffic information. Another reason is I can find out exactly what the weather is going to be in the area of a particular city which can be very helpful when I am trying to decide on a route to my final destination. XM Radio is a paid service, so they should be able to broadcast what they want.
